Certificate

We hereby certify that the

Hahnemühle FineArt GmbH

Archival Papers and Boards

are produced in compliance with DIN 6738, ISO 9706, ISO 16245, ANSI Z 39.48-1992
as well as the Standard-PAT and Color-PAT.

Furthermore the Hahnemühle papers and boards meet the following quality criteria and more:

acid free with a pH value between 7.5 and 9.5 due to a neutral paste application,
buffered against air pollutants with a calcium carbonate (CaCO_3) content of at least 4%,
free of wood fibres,
made from bleached (tcf/ecf) pulp and/or linters,
extremely lightfast,
complies with the highest class of durability and lasts for hundreds of years,
coloured papers and boards do not bleed due to use of premium colour-pigments.

Hahnemühle FineArt GmbH - certified in compliance with ISO 9001

Hahnemühle

We produce our papers with passion and focus on quality instead of quantity, we are a manufactory rather than a factory. The best raw materials, craftsmanship skills, a lot of handicraft and a co-operative relationship with our customers make for the excellent and internationally acclaimed quality of our products. For centuries now, papers characterised by the 'Rooster' have been used by artists or as reliable media for technical applications. Our innovation power resulted in the invention of the 'FineArt Inkjet Papers'. Hahnemühle is the pioneer in this area and remains the world-leading provider of fine art inkjet papers.

Painters, graphic artists and designers, illustrators, printers, photographers, advertising experts,

The result of our tradition and quality conscious work delights Hahnemühle fans worldwide.

archivists, bookbinders, art students, scientists, engineers and lab assistants – they all use papers and cardboards by Hahnemühle. For each of them, paper is a natural working appliance that has to meet high standards for different reasons. With Hahnemühle papers, our customers emphasize the features when it comes to art and fine art printing, as well as safe and reliable results in the technical area.

Paper manufacturing at Hahnemühle

Our papers are extremely versatile and they have to be as their properties have to meet a large number of requirements. Here, you will find noteworthy information on manufacturing techniques, quality characteristics, quality management and testing procedures. More information can also be found on our homepage www.hahnemuehle.com.

Production on the cylinder mould paper machine

Traditional paper production on a cylinder mould paper machine starts in the vat housing a mould, that is a stainless steel box in which a cylinder mould is placed. Hahnemühle FineArt uses moulds of different structures to make velin or ribbed paper, with or without watermark.

A highly diluted mixture of pulp and water is fed into the vat with combined unidirectional and counterflow forming a fibrous web on the cylinder mould. The sheet is transferred to the wet end of the machine with a suction roll located at the highest point of the cylinder mould.

Not only does the cylinder mould produce genuine watermarks, the paper sheet can also be divided into smaller sheets. For this purpose, special bands and metal dividers are attached to the surface of the cylinder mould with copper wire to mark the size of individual sheets. Thus the mould-made paper produced on a machine can have four ragged, or deckled, edges characteristic of hand-made paper. Some paper fibres gather on the attached deckle frames. As the speed of the machine can be controlled, after the press section, the still wet paper can be torn along the marked, weaker lines. Only a sheet edge thus obtained can be treated as a deckle edge characteristic of mould-made paper. The cylinder mould paper machine is not only used to make paper sheets, but also to produce paper rolls.

Natural felts form the unique surface texture of the papers.

The double wet press section consists of a pair of [1mm] hydraulically loaded rolls connected with a parallel drive and a common top and bottom felt. To improve water extraction, the paper web is then gently heated with an infra-red dryer and introduced to the dryer section which consists of a series of

steam-heated cylinders. Thanks to special felt material used in the first dryer group, paper does not come into direct contact with the cylinder surface and thus maintains good surface uniformity on both sides.

Production on the fourdrinier machine

Production of paper on a continuous-wire Fourdrinier machine starts with the discharge of a highly diluted mixture of pulp and water onto the machine. The papermaking stock is evenly distributed on the flat, plastic wire which continuously rotates around a series of supporting rolls and guiding rails. In addition to their support function, these rolls and guiding rails are also used to drain the water from the mixture of pulp and water.

Two-thirds of the way along the wire section, the slurry is so drained of water and compact that the fibres will no longer shift. Further water extraction is only possible with flat suction boxes which build up a vacuum. A so-called dandy roll is applied and lightly pressed down to make the paper surface more

Papers with watermark and genuine deckle edges are produced on the mould-made paper machine.

equal. It is also used, for example, to apply the ribbed structure typical of Hahnemühle FineArt paper.

The wire section is directly followed by the press section, which is the last element of the wet part of the paper machine. Two hydraulically loaded pairs of rolls and an optionally utilized third press are used to press out the remaining water from the endless paper web. The continuously rotating felt is used to transfer the web and remove water. Felts, some of which are still made of wool and others of a mixture of wool and synthetic fibres, have an exceptional capability to make different, characteristic marks.

The dandy roll gives the paper a ribbed structure.

The moisture remaining in the paper web is removed by contact drying with steam-heated metal drying cylinders.

To enhance this process the felt is pressed against the cylinder surface and hot air is blown in through air nozzles. The paper web is dried carefully at a temperature gradually increasing from about 70° C at the first cylinder to about 120° C at the end of the dryer section. In order to quickly expand the paper, the temperature is abruptly lowered at the cooling cylinders located immediately after the dryer section. The web can optionally be passed through a calender stock. A re-moisturizer, in combination with a continuously operating measuring system, permits the paper moisture to be monitored and improved before it is rolled.

Certificate of Conformity

Hahnemühle FineArt

Herewith we declare that all papers and canvases of Hahnemühle FineArt GmbH do not contain raw materials from animal sources.
The used pulp fibres come from sustainable sources and have been chemically mechanically processed.
The fibre content in the paper is more than 10% of the total weight.
Furthermore all papers, canvases and leather albums of Hahnemühle FineArt GmbH do not exceed the limits of the following substances (Guideline 2015/863/EU ROHS):

- Lead (0.1 %)
- Hexavalent Chromium (0.1 %)
- Mercury (0.1 %)
- Cadmium (0.01 %)
- PBB (Polybrominated Biphenyls) (0.1 %)
- PBDE (Polybrominated Diphenyl Ethers) (0.1 %)
- DEHP (Di (2-Ethylhexyl) Phthalate) (0,1%)
- BBP (Butyl Benzyl Phthalate) (0,1%)
- DBP (Dibutyl Phthalate) (0,1%)
- DIBP (Diisobutyl Phthalate) (0,1%)

The use of PCBs (polychlorinated biphenyls) is prohibited.

WATERCOLOUR BOOK 100% COTTON

Hahnemühle Watercolour Book made of 100% cotton rag - masterful craftsmanship meets the finest cotton fibres

The Hahnemühle Watercolour Book made of 100% cotton fibres is a must-have for all watercolour artists. The pure cotton fibres give the paper a natural white tone, an incomparable texture and high resistance. Colours flow superbly on the natural white paper, while brushes slide gently over the surface and inspire the artist. Premium hardback book containing 30 sheet of 250 gsm paper with a homogeneous, fine-grained surface structure on the front and back, so artists have 60 pages available for creative design. Suitable for all watercolour techniques, especially the wet-on-wet technique. Masking pens and masking tapes can be removed without leaving any residue. Even the use of an eraser is possible thanks to surface sizing. The pitch-black, sturdy cover with a black bookmark gives the book the elegance and stability that it needs as an indispensable companion. A rubber band closes the book tightly.

Watercolour Books 100% Cotton are available in landscape and portrait format in A6, A5, A4, 14 x 14 cm and 19.5 x 19.5 cm. Like all Hahnemühle papers, they are age-resistant, acid-free and vegan.

Sustainability

Clean water, natural fibres, first-rate expertise in the art of paper production and absolute commitment to quality have formed the foundation of our success for over 435 years. In our business, we feel we have a certain duty towards the environment. For many years, we have been supporting both regional and international environmental projects as part of our 'Green Rooster' initiative, including reforestation, animal protection and environmental education programmes. These projects are very important to us and we're delighted to be able to use a share of the profits from our Natural Line to contribute towards environmental and climate protection.

Sustainability is a living tradition at Hahnemühle and the reason for the paper mill's settlement in 1584 still holds true today: Hahnemühle produces paper in a landscape conservation area with pure spring water. Accordingly, paper production must be environmentally friendly, sustainable and is strictly controlled.

The water we use to produce our high-quality FineArt papers comes straight from the source and is set apart by its particularly high level of purity, meaning it doesn't need to be chemically treated at all. Even at the end of the production cycle, the water is fed into the nearby river Ilme - free from chemical cleaning agents, biocides or preservatives.

Protect what Matters

Our fibres are sourced exclusively from primary fibres. One key factor here is the lignin-free cellulose we use, sourced from deciduous and coniferous trees that grow in sustainably managed forests and are FSC- or PEFC-certified. The types of linters also play an essential role. Linters are fine fibres framing the seed of the cotton plant, which occur as a by-product of the textile and oil industries. Hahnemühle has been producing high quality artists' papers from innovative, rapidly renewable fibres since 2008. The Hahnemühle Bamboo paper was and is the pioneer. In addition, there are now papers made from hemp and agave fibres as well as sugar cane fibres which are agricultural by-products.

Electricity -
100% renewa-
ble energies

Certified for
Environmental
Management

We use electricity and natural gas as our energy sources. For many years now, all the electricity we need for our paper production has been generated exclusively from renewable sources, such as wind, water and solar energy. This enables us to sustainably reduce our CO2 emissions. We heat our site using natural gas. Due to our waste heat recovery system, the emissions from our furnace are considerably below the legal limits, by more than 40%.

Hahnemühle is certified for all its sustainability measures and its environmentally sensitive actions according to the ISO 14001 guideline for environmental management on a regular basis. This is part of Hahnemühle's journey to becoming the first climate-neutral paper mill by 2030.

We are proud of what we have achieved so far and are constantly working towards putting further measures in place and finding more environmentally friendly and sustainable ways to run our business. Our proximity to the natural world provides a daily reminder of what we need to protect. For us, this is both a responsibility and an incentive.

Protect what Matters

Agave Watercolour

290 gsm · 70 % Agave fibre, 30 % cotton rag · cold pressed
Agave Watercolour is a natural white watercolour paper. It is characterised by its cold pressed and very homogeneous surface texture. It is suitable for all kinds of watercolour techniques, especially for glazing. The special surface of the 290 gsm paper allows brushes to slide over the surface easily and allows for brilliant colour gradients. Washouts and corrections are simple possibilities. Agave Watercolour is acid-free, non-aging and vegan. By using sisal, a fast-growing and resource-saving raw material, Agave Watercolour is the ideal painting surface for environmentally conscious artists. All Agave Watercolour blocks are glued on 4 sides. Individual sheets can be easily removed with Hahnemühle's bamboo folder.

Hemp Sketch

80 gsm · 60 % Hemp fibre, 40% cotton rag
Hemp Sketch is a natural white sketch paper with a fine grain, guaranteeing an excellent colour abrasion. Due to the use of hemp fibre, the 80 gsm Hemp Sketch paper impresses with an excellent paper resistance. It is suitable for all dry techniques such as graphite, red chalk, coloured pencil and charcoal, and is characterised by an excellent erasability. Hemp Sketch is a first-class drawing paper that is unique due to its remarkable properties and its sustainability. By using fast-growing hemp fibre, slow-growing resources are conserved. All Hemp Sketch sketch pads contain 80 sheets and are glued at the top. The paper is acid-free, age-resistant and vegan.

Bamboo Mixed Media

265gsm · 90% Bamboo fibre, 10% cotton rag · cold pressed
Hahnemühle Bamboo 265 gsm is the first paper quality in the Hahnemühle Traditional FineArt Collection made of bamboo fibres. The natural white paper which is extremely age resistant has a unique surface suitable for different painting & drawing techniques such as watercolour, acrylic, pastel and for sketching and drawing with charcoal and red ochre. This warm toned, high-quality paper allows excellent contrast and colour vibrancy. It offers a brilliant flow of colours and ensures high luminosity. Due to the use of highly renewable bamboo grass, Hahnemühle Bamboo 265 gsm stands for natural and resource-saving paper production.

The Collection

The name Hahnemühle stands for paper of excellent quality. For more than 435 years, the company has been producing finest papers in Germany at the foot of the Solling.

Watercolour
Ingres Pastel
Sketch

Selected raw materials, pure spring water and first-class processing characterises Hahnemühle papers. The know-how that is passed on from generation to generation is reflected in the products and makes them unique.

The collection with the special character that is unique to traditionally manufactured papers includes premium products for each classic painting technique, which are precisely tailored to the requirements of the techniques. Valuable cotton papers and exquisite mould-made papers produced on the traditional cylinder mould machine complete the program. All Hahnemühle artist papers are acid-free and resistant to aging.

The new product range

Watercolour

Hahnemühle The Collection Watercolour 300 and 640 set new standards for high-quality watercolour papers. A carefully chosen variety of cotton offers extremely strong fibres and incomparable purity. The selection of the best raw materials and exclusively natural filler materials gives the Watercolour 300 and Watercolour 640 papers their unparalleled quality. The prized cotton papers, The Collection Watercolour 300 and 640, are characterised by a very durable paper surface that is well suited for demanding watercolour techniques. The fibres do not lift, rub off or loosen, even when applying multiple layers of varnish or colour, or when using masking pens and tape. This paper lets you use the most beautiful colours and create remarkable wet-on-wet paintings.

Watercolour

Produced using a traditional cylinder mould paper machine, the papers have a homogeneous surface that gives the artist optimal control of their pigments. The Collection Watercolour 300 and 640 are available in cold pressed, rough and satin. Artists who have high expectations of themselves and their materials will love Hahnemühle The Collection Watercolour 300 and Watercolour 640. The exquisite watercolour papers are available in 300 gsm and 640 gsm in either sheets or blocks. All Hahnemühle papers are vegan, age-resistant and acid-free.

Ingres Pastel

Ingres Pastel 100 gsm

Hahnemühle The Collection Ingres Pastel offers pastel artists the perfect surface. Designed for this specific artistic technique, the Ingres Pastel Paper has fine ridges and a slightly rough surface. It allows even colour adherence without using a lot of pressure, producing precise and colour-intensive results. Thanks to the exclusive use of high-quality pigmented colours in the production of this paper, Ingres Pastel 100 boasts exceptional lightfastness. It is ideal for pastels, pencils and red chalk. Hahnemühle Ingres Pastel 100 gsm is available as a pad with pages in white or nine other different shades. The paper content of each pad has two cut edges and two deckle-edges. The deckle-edges are created naturally during the production process. This process can result in minimal format deviations, which underlines the character of a natural product and makes each sheet unique. The sheets are available in white, bright white, ivory, antique, corn yellow, grey brown, brown, rose pink, dark blue, middle grey, mouse grey and black. Hahnemühle Ingres Pastel 100 is vegan, acid-free and age-resistant.

Sketch

Sketch 140 gsm

The Collection Sketch 140 is the only 100% cotton sketch paper in the Hahnemühle Collection. The elegant paper has an exceptionally grainy texture, which can only be achieved through the use of natural felts in the production process. The grainy surface of the natural white paper allows for exceptional colour adherence. Smooth transitions and delicate hatching create depth and 3D effects. At 140 gsm, the exquisite paper is robust yet pleasingly flexible. Hahnemühle Sketch 140 is vegan, acid-free, age-resistant, and is specially designed to meet the requirements of dry techniques.

Watercolour Papers

The mould-made watercolour papers made by Hahnemühle are real vat papers, produced on a cylinder mould machine, which give them the characteristic deckle edges. The use of various types of natural felts give these papers a unique surface structure. From hot pressed surface textures for botanical and floral studies to cold pressed papers for strong portraits to rough surface structured papers for abstract landscape paintings.

The papers allow for optimum colour reproduction, have a resistant surface and withstand repeated erasures. These features make them suitable not only for watercolours, but also for other wet-painting techniques, such as gouache, tempera and acrylic, as well as for drawing with charcoal, pencil and crayons.

Watercolour Selection

Watercolour Selection - New qualities, more papers and a new design!

Various watercolour papers in one pad

A variety of wonderful watercolour papers, but which one is the right one for me? With a cold pressed, rough or maybe a hot pressed surface texture? How does watercolour paper made from 100% cotton rag behave? Rather a bright white or natural white watercolour quality? If you ask yourself these questions, the Watercolour Selection pad is exactly the right thing for you. The Watercolour Selection pad contains a large selection of high-quality Hahnemühle watercolour papers with a variety of surfaces and grammages. From exquisite 100% cotton papers to watercolour qualities consisting of resource saving natural fibers and papers made from high-quality -cellulose. All Hahnemühle watercolour papers are acid-free, age-resistant and vegan. A perfect pad for beginners and experimental artists. Also ideal as a gift.

Turner

300 gsm · cold pressed · 100% cotton rag · natural white

This high-quality, 100% cotton rag, mould-made watercolour paper is natural white, acid free, lightfast, extremely age resistant and material sized. The soft irregular paper texture allows for a wonderful colour absorption with slight granulation in the glaze. The blocks are glued and gauzed to ensure flatness when wet. All sheets (in approx. 48x33 and 50x65 cm) contain the watermark and have 4 genuine deckled edges. The soft, slightly irregular surface structure is ideal for professional artists. "Turner" is suitable for all wet painting techniques: watercolour, gouache, tempera and acrylic.

Mould-made Watercolour Paper

Hahnemühle 300 gsm

300 gsm · cold pressed and rough surface · natural white
Hahnemühle 300 is a natural white watercolour paper and is produced on a traditional cylinder mould paper machine. The paper is natural white, acid free, lightfast, extremely resistant to ageing and material sized. The blocks are glued and gauzed to ensure flatness when wet. All sheets (in approx. 50x65 and 106x78 cm) contain the watermark. This paper is suitable for all watercolour techniques, especially wet-on-wet painting, for creating effects with crisp and hard-edged colours, smooth washes and dry brush technique. This paper is also ideal for painting techniques such as gouache, tempera and acrylic.

Watercolour papers

Hahnemühle

The Hahnemühle watercolour paper is produced on a fourdrinier paper machine. Natural felt is used to obtain various surface structures – cold pressed, rough or hot pressed. These papers are really “multi-talented”: they are equally suitable for watercolours, gouache, tempera, pastel, charcoal, pencil and crayons.

ACID

Watercolour Postcards

Watercolour Paper Torchon

275gsm · fine cloudy surface · bright white
The French word “torchon” characterizes a very coarse linen structure. So is the surface of this paper. The blocks are glued and gauzed on all 4 sides to ensure flatness when wet. “Torchon” is ideal for all wet painting techniques: watercolour – especially for effects with hard-edged colours and smooth washes – and also gouache, tempera and acrylic. Acid free, lightfast and extremely resistant to ageing.

Watercolour Paper Cornwall

450gsm · cold pressed and rough · bright white
Bright white, acid free, lightfast and extremely age resistant. The heavy weight provides a very stable paper that ensures improved flatness when wet. "Cornwall" offers good colour flow and high colour intensity. This quality is ideal for wet painting techniques: watercolour – especially smooth washes and dry painting – and also gouache, tempera and acrylic. The blocks are glued on all 4 sides. Acid free, lightfast and extremely resistant to ageing.

Watercolour Book

New formats and new design

The Watercolour Book contains natural white watercolour paper with fine-grained surfaces on the front and back that are popular with watercolourists. You can create motifs over the entire width of the book. Even on long journeys, 60 pages provide plenty of space for holiday or landscape sketches and paintings. The Watercolour Book is suitable for all watercolour techniques, especially for the wet-on-wet technique. A water-repellent cover protects the content, available in eight different sizes. Vegan, non-ageing, and acid-free.

the ZigZag book

ZigZag

18 pages of the finest watercolour paper folded in accordion style provide unlimited possibilities. No matter if it is the giraffe with the longest neck, the widest panorama or an Instagram-style pictorial, the ZigZag book you can do it all. Ideal for urban sketchers and all those that love to paint and draw while being on the road.

The watercolour paper features a fine-grain surface on both sides and is perfectly suited for all wet painting techniques with brush or pen. The 300gsm weight ensures stability and thanks to the surface sizing, colours flow with ease and can be lifted without any problems. The paper is eraser-resistant and masking fluid and tapes are removed residue-free.

Rugged oversized book covers help to protect the content. Due to its durable cover, the ZigZag book is insured to outside influences. An eye catching red band in the upper right corner can be used to close the book securely. The rooster on the backside underlines the exclusivity of the Hahnemühle creative prowess.

With "Carnet de Voyage" and "Carnet Aquarelle", painters are equipped with the right tool for their creative passion on a painting trip. The heavy grammage of the cold pressed watercolour paper and its spiral binding are ideal for creative travel diaries.

Watercolour Postcards

Edition 2023/2024

230gsm · rough and cold pressed · material sized

Box (Content 30 sheets)

Ref. No.	Surface	Size in cm
10 650 000	rough	10.5 x 14.8
10 650 150	cold pressed	10.5 x 14.8

Watercolour painters send greetings using self-designed watercolour postcards. Creative watercolour painters will find 30 natural white postcards, acid free and the highest archival quality, in this attractive metal box featuring the new editions image. With the address panel printed on the reverse, these cards have a rough and cold pressed textured surface and rounded corners which are ideal for personalised greetings or invitations.

This very absorbent paper is ideal for “freestyle” brush painting. “Sumi” means “black ink” and “e” means both “path” and “painting”. The style of brush painting is both a simple and yet highly aesthetic drawing made of powerful, mostly chasing and rapidly executed lines.

The pads are glued on one long side and have interleaf sheets between the Sumi-e sheets..Acid free and age resistant.

Hahnemühle

Sketch pads

"Each sketch is transformed into a piece of artwork through our imagination."

Sigmand Graff

Sketch Papers

Our white and natural white sketch papers with fine grain surfaces are perfectly suited for all dry painting techniques such as pencil, crayons, charcoal, red ochre etc.

Thanks to the best ingredients and the wide range of weights from 100 gsm up to 250 gsm, this paper is an optimum base for various artistic applications.

100 gsm

A fine, soft drawing paper with high volume. The fine matt surface structure allows for an even colour application. The natural white paper helps to ensure the colours look soft and unencumbered. Suitable for all dry-painting techniques. The pads are available glued on top or spiral bound with micro-perforation. In both cases, once removed from the pad, the sheets conform to the exact specified format size. Acid free and with high longevity.

Pads (Content 100 sheets)

Ref. No.	Binding	Size
10 628 245	glued on top	A4
10 628 246	glued on top	A3

10 628 249	spiral bound, micro-perforated	A3

100 gsm

The Tradition sketchpad has a natural white paper with a very durable surface making it well suited for both light and heavy line work as well as solid patches of colour with both soft and medium hard pens. These same surface properties produce great results for burnishing and rubbing-in techniques, making it an easy and effortless process.

This spiral pad has “micro-perforated” sheets making it easy to detach your artwork from the pad and produces a clean well-trimmed edge and the detached sheet relate to the pad size of the paper. Another bonus of the spiral-bound construction is that it produces the perfect companion for you take out on location and “on the road” with you.

Dessin

150 gsm

The 150 gsm paper looks and feels very smooth but features a fine grain guaranteeing excellent colour abrasion. With a natural white tone it makes for good contrasts and a high level of vividness. Artists using the Hahnemühle sketch paper 'Dessin' praise its absorption capacities that prevent the drop off of unfixed pigments. Available in five formats. The new waistcoat-pocket format A6 is particularly suited for artists who want to capture whilst out on the road.

This spiral pad has "micro-perforated" sheets making it easy to detach your artwork from the pad and produces a clean well-trimmed edge. The detached sheets relate to the pad size of the paper. Acid free, high longevity.

Hand Lettering

When letters become art...

The Hahnemühle Hand Lettering Block offers hand lettering enthusiasts a first-class foundation for practising their art. Developed together with hand lettering artists, it has been tailored to their specific needs, forming the basis for outstanding lettering.

Brush pens, fine-tip pens and pencils simply glide across the highly smooth paper. Preliminary sketches can be easily rubbed out on the coated surface, and the tips of sensitive brush pens or paintbrushes are preserved. The smooth, closed surface traps colours and prevents bleeding.

The brilliant white paper ensures vibrant colours; both monochrome and multicoloured motifs stand out and can be easily scanned and then further processed digitally. Our pads offer the perfect absorption and drying behaviour for brush pens, fine-tip pens and felt-tip pens.

The paper weighs 170 g/m², and the pads – 25 sheets each and bound at the top – are available in A5 and A4 format.

Skizze

The pad covers, with their clear design, are akin to the paper within. An unobtrusive, exclusive sketch paper is easy to work with at any opportunity. The bright white makes for beautiful gradation of the colours and the consistent structure allows for both drawing quickly and working accurately. Suited for all dry-painting techniques and pencils of all degrees of hardness. With a weight of 120 gsm, the paper is pleasantly flexible. The 190 gsm version, remains flexible but gives that extra strength required for continued workability.

The pads are available glued on top or spiral bound with micro-perforation. In both cases, once removed from the pad, the sheets conform to the exact specified format size. Acid free and with high longevity.

Pen Pad 250 gsm

250 gsm • double sized

This solid paper is designed to work accurately with the finest hatchings and shades of colour. Pencils or drawing pens virtually flow across the extremely smooth surface, allowing for rich lines and gentle drawing style at the same time. Suitable for all grades of pencil hardness, together with drawings using bow-type drawing pens, ink, drawing pens, paint brush and calligraphy pens. Natural white, acid free, high longevity.

VELVET

185 gsm

This paper – which seems to be an ordinary paper at first glance – has a silky structure that allows for extraordinarily accurate drawing with virtually no blurring. It has a bright white surface which makes for clear contrasts. Controlling the pen is made pleasantly simple and when used with higher pressure, the pen makes for fine notches, allowing for undreamed of possibilities. Suited for all dry-painting techniques. Acid free with high longevity.

Sketch

Sketch Books

Initial picture ideas and important thoughts fit into every sketchbook. Between two book covers, they are well protected and always available. Hahnemühle offers sketchbooks as small handy companions in A6 and A5 formats, larger A4 and A3, and even in square formats.

Each Hahnemühle Sketch Book contains high-quality, thick papers with rough surfaces for sketches with pencil, colour pencils, ink, pastel and watercolour paints, or smoother surfaces for sketches with ink pens. The Hahnemühle Sketch Books are available spiral-bound or thread-bound, with closure flaps and small pockets to hold loose memorabilia. Discover our selection here.

Sketch Books

The Grey Pad & The Cappuccino Pad

The Grey Pad and The Cappuccino Pad

Hahnemühle is extending its range of very popular toned sketch papers with new pad formats. The Grey Pad and The Cappuccino Pad complements the Hahnemühle toned sketch paper assortment, inspired by the success of The Grey Book and The Cappuccino Book.

The light grey smooth sketch paper in The Grey Pad perfectly captures rainy days or dark nights, by setting shadows or white highlights so wonderful details can appear. Pens glide easily over the gently toned paper, ideal for paintings with water-based pens and inks. The cappuccino-coloured paper is reminiscent of freshly frothed milky coffee and offers warm-toned motifs an excellent painting base. Soft tones stand out on the smooth paper surface and can bring to life the unique luminosity of coloured pencils on the 120 gsm heavy paper.

These smooth coloured sketch papers both have a closed surface are perfectly suited for ink pens, fountain pens, coloured pencils and acrylic markers as well as all other water-based pens with little abrasion. Pads in both ranges are glued to the top and contain 30 sheets of 120gsm paper. When framed, these artworks will also form a nice eye-catching statement on the wall. The Grey Pad and The Cappuccino Pad are available in sizes A6, A5, A4, 14 x 14 cm and 20 x 20 cm. Like all Hahnemühle papers, they are aging-resistant and vegan.

10 625 334	20x20 cm

The CAPPUCCINO Book

With its light-brown paper, this sketchbook reminds of a cappuccino with fresh froth. Therefore, it's the ideal first choice for warm shades of colour. On the restrained background, colours stand out well and shine gently. By setting white accents, you can create wonderful contrasts. The smooth sketch paper, with its closed surface, is perfectly suited for working with Indian-ink pens, fountain pens and acrylic markers, as well as other water-based pens with minimum abrasion.

The dark-brown cover of the sketchbook nestles smoothly in your hands. Firm and discreetly grained, it feels like real wood. Bound in several layers and thread-stitched, all the pages sit solidly and allow the artist to work on two pages, across the centre seam. A brown bookmark ribbon completes the premium-quality features. With 40 sheets / 80 pages featuring 120 gsm, The Cappuccino Book is slim and an ideal companion if you are on the road or travelling. At the same time, it comes with enough reserves for many subjects. Available in A4 and A5, acid-free and with a high level of longevity.

Books (Content 40 sheets /80 pages)

Ref. No.	Size
10 628 995	A5
10 628 996	A4

THE GREY BOOK

The smooth sketch paper is well suited for working with Indian ink, fountain pens and acrylic markers, as well as other water-based pens with minimum abrasion. Colours stand out well on the light-grey, non-absorbing surface. Subjects can be laid out from bright to dark and completed by setting white accents.

With its unobtrusive figure, the anthracite coloured cover provides the impression of precious wood and touching it feels great. Bound in several layers and thread-stitched, all the pages sit solidly and allow the artist to work on two pages, across the centre seam. A red bookmark ribbon completes the premium-quality features.

With 40 sheets/80 pages featuring 120 gsm, The Grey Book is slim and an ideal companion if you are on the road or travelling. At the same time, it comes with enough reserves for many subjects. Available in A4 and A5, acid-free and with a high level of longevity.

Nostalgie

The popular classic.
Thread stitching makes for a solid binding and good flatness across the sheets. Double sided sketches and drawings across the fold can be created without any problems. With an anthracite-coloured cover featuring a linen structure, the book is hard-wearing and pleasant to the touch.

Each book features 40 sheets / 80 pages of heavy, 190 gsm natural white paper. Clearly defined pen control and delicate hatchings allow for every kind of work – from the architectural sketch to the fast, vividly coloured drawings. Suitable for use with all dry-painting techniques in addition to wet colours, the paper brings a great sense of versatility and precision to the artistic process. Acid free with a high longevity. Available in A4, A5 and A6 sizes, each with a portrait or landscape option.

Travel Journal

Travel Journals & Travel Booklets in Counter Display

filled with 44 products

The handy Travel Journals or Travel Booklets are ideal for jotting down ideas or impressions whilst on the road. They are a practical companion for mobile people, who prefer to record their thoughts, feelings or impressions in a traditional manner between the covers of a book or booklet. The Travel Journals from Hahnemühle, available in 9 x 14 cm and 13.5 x 21 cm size in both portrait and landscape format, are even held together by a practical rubber band. The Travel

Booklets are available in sizes 9 x 14 cm and 13.5 x 21 cm in portrait format. The booklets are also provided with a small pocket in the rear cover; a great idea for collecting loose notes, photos or other "valuables" that shouldn't be lost. The unlined sketch paper with a grammage of 140 gsm has a light structure ensuring good colour adhesion, making this paper ideal for lively and long-lasting pencil drawings. Acid free and age resistant.

D&S

Our strong and robust D&S sketchbook has a solid thread stitching making the turning of the pages smooth and easy. The paper has a fine non-slip surface with superb abrasion properties that enables you to effortlessly create broad wide lines. The natural white shade gives a pleasing and charming tone to enhance the subtle shades of colour in your pencil drawing. Besides pencil work, the book is ideal for use with watercolour pencils as well. Finding your page in the D&S sketchbook is easy thanks to the handy red ribbon place mark (please note that this is not found on the D&S “Mini” sketchbook).

Hahnemühle

Pastel *Papers*

Develop your creativity!

Pastel painting – the oldest painting technique!

The pastel papers made by Hahnemühle not only reproduce the colours faithfully, but also allow a variety of special effects to be created. They are available with various surface structures – from smooth to ribbed – and in a wide range of colours. All types of paper guarantee perfect colour adhesion and optimum formation of pigments.

Pastel

Sketch / Pastel

130 gsm • 100% cotton rag • material sized

Sketch/Pastel 130 gsm is the first product in the Hahnemühle Sketch/Pastel range made from 100% cotton rag. The natural white paper has a fine grain and an even surface texture which ensures optimum colour adherence for clear and colour intensive strokes. This paper quality is perfectly suited for pencil, charcoal, red ochre and pastel paintings. Sketch/Pastel 130 gsm is acid free and age resistant. It is glued along the top edge and available in sizes DIN A5 to DIN A2.

Hahnemühle

The Hahnemühle range for oil and acrylic painting offers papers with a fine linen texture, as well as qualities possessing a more natural paper character. Multi-layered viscous colour applications and thinly layered transparent colour applications are possible on the different qualities with optimum results.

230 gsm

This high-quality oil/acrylic paint board is natural white and is made of 100% cellulose. The board is internally sized and has a special barrier layer to prevent bleeding and a halo effect. This quality is perfect for beginners, advanced painters and professional artists. The board possesses the natural linen structure of a genuine canvas guaranteeing the excellent results to be expected from oil and acrylic painting, as well as from oil pastel painting. Acid free and age resistant.

A natural paper specially designed for acrylic painting, it is acid free and age resistant. It has a light felt finish that absorbs the colour and enables multi-layered viscous colour applications with optimum results. The natural white acrylic paint board – made of 100% pulp – is free of optical brighteners and therefore does not adulterate the vibrancy of the colours. This acrylic paint board is ideal for glazing and painting techniques similar to watercolours. It reflects the brilliance of the colours naturally.

The high surface weight of this acrylic paint board makes it very robust. This stable painting base ensures optimum results for multi-layered viscous and also thinly layered and transparent colour applications. The Hahnemühle acrylic paint board delights with its finely textured surface ensuring vivid colour rendition and attractive colour application. The bright white of the board makes the colours glow. Acid free and age resistant.

60 gsm

The PE (Polyethylene)-coated paper in our palette pad is ideal for mixing oil and acrylic paints. It provides a strong barrier against oil and moisture.

Each sheet can be torn off easily from the disposable pad and the next clean coated paper is ready for use.

Mounting Boards & Printmaking *Papers* Graphic Design

Classical Printing Methods – Hahnemühle Printmaking Papers

The high-quality Hahnemühle mould-made printmaking paper for traditional artistic printing techniques is produced in our mill on the cylinder mould paper machine. The single sheets have 4 genuine deckled edges (* 3 genuine deckled edges and 1 cut edge). With its matt, velvety soft and finely structured surface, this Hahnemühle mould-made paper is ideally suited for analogue artistic gravure, offset and flat printing processes. It is also very suitable for new digital printing technologies that do not require a coating on the paper - such as UV, Latex and Resin printing. It has a high volume and is characterised by its particular flexibility. All paper grades are made from exquisite raw materials, and are highly resistant to aging, acid-free and vegan.
BB = short grain · SB = long grain

10 105 105	1.25 x 20

The name alone says it all: this paper symbolises the company's tradition to produce classic artist papers in perfection. The artist paper, made of pure cotton is unsized and – consequently – extremely absorbent. The satin-finish makes for a particularly smooth surface. With a weight of 300 gsm, Hahnemühle 1584 is firm and hard-wearing while the cotton fibres provide flexibility at the same time. Four deckle edges and a watermark complete this high-quality paper.

Hahnemühle 1584 is particularly well suited for woodcut and silkscreen. Even in the case of multi-layer applications, colours are absorbed extremely well. It is available in the formats 56 x 76 cm as well as 80 x 120 cm and as 1.25 x 20 m rolls. Without optical brighteners, acid-free, unsized and alkaline reserved, it meets the highest ISO 9706 longevity standards.

Hahnemühle Mounting Board

The Hahnemühle mounting boards produced on a fourdrinier machine are used mainly for framing art exhibits. The mounting board is also used as the base for the Hahnemühle multi-laminate museum boards. Hahnemühle mounting boards are also suitable for the most diverse applications in printing and drawing techniques. Hahnemühle mounting boards are acid free and age resistant in compliance with DIN 6738 and ISO 9706. BB = short grain · SB = long grain

TECHNICAL PAPERS

Hahnemühle

Hahnemühle papers for technical drawings, with a light gram-
mage and a very smooth, micro-fine surface, allow for exact and
high-contrast drawings. The Hahnemühle transparent drawing
papers are also suitable for graphics, illustration, classical ink and pencil
drawings and sketches with fineliner and markers.

TRANSPARENT

SKETCHING AND DRAWING PAPER

Stationery Fine Art

Hahnemühle Sketch & Notebooks

Hahnemühle Traditional Artist papers are produced according to old recipes using high-quality raw materials and pure spring water. Hahnemühle combines centuries of experience with modern innovation and artists' inspiration since 1584.

With the introduction of the new Stationery line, Hahnemühle is consistently expanding its paper expertise into the field of writing culture. The notebooks are elegant companions in puristic designs, combined with fine details.

Capture your thoughts and ideas with the
joy of writing and passion for paper!
Writing down an idea on paper gives it
value and makes it feel more real.
Stationery Fine Art

Sketch & Notebooks

Individual, elegant companions for perfect note-taking and sketching

1584

by Hahnemühle

The elegant “1584 by Hahnemühle” notebook is available in the finest of colours: sea green, lilac and peach. With its attractive, feminine design it is the perfect note-taking companion.

Thanks to the three colour-coded bookmark ribbons it is easy to find your appointments and notes, and a rubber band helps keeping your thoughts, little notes and pictures safe inside the notebook.

With 200 pages, “1584 by Hahnemühle” offers enough space to make appointments and reminders in your own style that brings back a bygone moment and tames the chaos of everyday life. 160 white pages of the finest writing paper with a 40-sided colour-coordinated core. The paper slides pleasantly through your fingers and is an absolute must for analogue font lovers.

The haptic, durable cover of the notebook with a precious embossing on the back does not only protect the content, but it also makes the book a piece of jewellery that you like to surround yourself with. In practical A5 format, it fits in any handbag so that thoughts and memories can be captured at any time.

100 sheets / 200 pages:

- 40 sheets of dotted white writing paper, 90 gsm
- 20 sheets of coloured writing paper, 100 gsm
- 40 sheets of dotted white writing paper, 90 gsm
- 3 coloured ribbon bookmark

DiaryFlex

The individual notebook

DiaryFlex, the individual notebook by Hahnemühle that features interchangeable and replaceable content inserts. Several varieties of inserts including plain, ruled and dotted are available. No matter if used as a sketchbook or a notebook:

The 160 pages offer enough room for all of your thoughts and ideas. The natural white 100 gsm paper is perfectly suited for fountain pens, pens, fine-liners or pencils. The cover is classically exclusive and robust at the same time and also protects the contents of DiaryFlex perfectly. Even when you've filled your DiaryFlex with creative thoughts and ideas there is no need to say farewell. You can fill again and again with the various replacement booklets on offer. Just pull the note booklet out of the cover and replace with either a plain, ruled or dotted pack.

DiaryFlex 100 gsm (Content 80 sheets / 160 pages)

Display is filled with 5 books each of the DiaryFlex plain, ruled and dotted and 6 refills each of the plain, ruled and dotted. There are 33 products in total!

Sketch Diary

Sketch and Notebook 120 gsm

Drawings and thoughts belong together. With this handy sketch diary, you can now visualize your personal impressions and thoughts in words and pictures. These diaries are a perfect companion for everyday life, as well as for journeys, meetings, and so on. The left hand pages are ruled for personal notes and pages on the right are blank. This way you can easily create your drawing of memories and ideas with pencil, charcoal, red ochre, crayon or coloured pens on the right page, opposite to your notes and key words. The handy sketch diary is spiral bound and easy to use when laid flat.

Each sketch diary comes with a pocket in the back for little pieces of remembrance, souvenirs, notes or small items. Also provided: Two labels to personalise the cover. That way, each book of the three possible sizes A6, A5 and A4 will become your unique sketch diary.

Hahnemühle Originals

DESIGN MEETS UNIQUENESS

Luxury writing instruments for the finest paper

Inspired by the pattern of the cylindrical mould on our 19th-century paper machine, our exclusive writing instruments feature a guilloché surface. This decorative patterning on the palladium-nickel alloy adds a touch of sophistication to our fountain pens, rollerballs and ballpoint pens, while evoking the moulds used by our papermakers. All our pens are produced in limited quantities and are a top-notch addition to the writing paper in our Hahnemühle notebooks.

Experience the perfect pairing of pen and paper! Every pen glides over the smooth paper, its ink sitting on the surface with richness and precision. Every page in your Hahnemühle notebook is a revelation when you write with, say, our fountain pens kitted out with rhodium-plated 18-carat gold nibs.

Treat yourself to a luxury writing experience: see for yourself how time slows down as your thoughts flow onto the page and you can focus on what really counts!

HAPTICS MEET CONNOISSEURS

Notebooks for people who love writing

Our expertise lies in crafting the finest writing paper and certificate paper, adorned with a cockerel watermark. Since our paper mill was founded in 1584, we have kept a resolute focus on developing the range established by our founder, Merten Spieß. We have created papers for the arts (including the art of writing) for centuries, and continue to do so in the present day.

Painters, graphic artists, illustrators, printers, photographers, advertisers, archivists, book-binders, art students, schoolchildren, scientists, engineers and laboratory technicians all use Hahnemühle papers. For all of them, paper is an indispensable tool for their work, a tool that they justifiably expect to meet the highest demands.

Our Hahnemühle FineNotes notebooks see us offer you an exquisite companion that appeals to all your senses: the finest creamy off-white Hahnemühle watermarked paper, enclosed between exquisite covers that protect your utterly personal entries – for a writing experience that both looks and feels stunning.

Digital FineArt Collection

„Turning Images into Art“

The Digital FineArt Collection is a comprehensive assortment of high-quality, unique FineArt inkjet papers created for customers who are looking for something special and want to get the best out of their images. Achieving outstanding printing results and a high age resistance of over 100 years, the FineArt inkjet papers meet the highest standards for fine art applications and are perfect for long-term exhibitions, art collections and special editions.

To comply with these requirements, high-quality and ultra-pure artist papers are used as a paper basis. Specially manufactured natural wool felts give the artist papers their unique surface texture, providing a three-dimensionality that enhances the image effect thanks to an incredible depth. The heavy FineArt papers, which are based on cotton or alpha cellulose obtain a high grammage, distinctive paper thickness, and special tactile feel that increase their sense of value. A premium inkjet coating, which results in an impressive reproduction of colour and detail, incredible contrasts and deep blacks, round off this luxurious high-end assortment of individual FineArt inkjet papers.

Hahnemühle Photo

The Quality Choice For Everyday Printing

Searching for the right inkjet paper for everyday work?

Take a look at our Hahnemühle Photo range. Hahnemühle Photo is a compact basic assortment comprising six high-quality inkjet media. Regardless of whether you choose basic fine art, classic photo paper or canvas – Hahnemühle Photo has the right product to meet any need and is ideal for printing photos, posters and photo books.

All Hahnemühle Photo media are relatively thin and feature a smooth, barely textured surface, making them easy to print on and process. Nevertheless, the printing quality is convincing and delivers the best results in daily printing. With an age resistance of up to 30 years, the papers are perfect for all applications where the highest museum-level quality is not required.

Extract from our sales and delivery conditions

We deliver:
Europe:

- minimum order value over 500.00 EUR ex works (EXW)
- order value over 1,500.00 EUR free German border
- further conditions have to be agreed separately.

Worldwide:

- minimum order value over 500.00 EUR ex works (EXW)
- order value over 1,500.00 EUR free German seaport (FOB) / free German airport (FCA)
- further conditions have to be agreed separately.

- Postal parcels are despatched from Dassel, Germany.
- Conditions according to Incoterms 2010.

Storage of papers
Paper is sensitive and has to be stored protected from every kind of humidity: best at a temperature of +20 °C and a relative humidity of 50 %.
In case of non-observance we cannot take over a guarantee for the maintenance of an impeccable condition.

Packing units
We ask for consideration of the stated packing units.
Delivery of incomplete packing units is not possible.

Transport damages
We are not liable for transport and hidden damages, but railway, forwarding agency, German parcel services or post as carrier.

- Please note the following items:
- Examine incoming packing pieces outward thoroughly
For damage assessment inform immediately the goods station within 7 days at the latest, the forwarding agency or German parcel service within 3 days at the latest, the postal office within 24 hours at the latest.
 - Leave goods and packing unchanged till damage assessment.
 - Take photos if possible.

Should you do not assert your claims by yourself we need for adjustment of damages:

- factual statement,
- original way-bill,
- a transfer declaration given by you.

Terms of Delivery and Sale

Terms of Delivery and Sale

Version: July 2022

1. Scope and Formation of Contract

1.1. The following terms and conditions apply to all deliveries and services which we perform in the capacity of a Seller or Supplier. They apply exclusively towards entrepreneurs, legal persons under public law or a special fund under public law in the meaning of Section 310 (Content 1) of the German Civil Code [BGB]. These terms and conditions apply exclusively. Deviations from the subsequent terms and conditions as well as terms and conditions that conflict with them apply only if we expressly acknowledged this in writing. These terms and conditions apply equally to all future business transactions between the Parties even if we deliver the goods in the knowledge of conflicting or divergent terms and conditions. 1.2. As the individual case may be, individual agreements entered into with the Customer (including subsidiary agreements, supplements and amendments) shall in any case take priority over these terms and conditions. The substance of such agreements is contingent upon a written contract and/or our written confirmation. Legally relevant declarations and notifications which the Customer shall submit to us following the formation of the contract (e.g. deadlines, notifications of defects, declarations of rescission, etc.) must be stipulated in writing to become effective. 1.3. Our offers are subject to confirmation and non-binding. This applies even if we provide catalogues, technical documentation, miscellaneous product descriptions or documents (Documents) – even in electronic form – to the Customer. We reserve the unlimited title and copyright to these Documents. They shall be made accessible to third parties only following our prior approval. If the contract is not awarded to us, all Documents shall be immediately returned to us at our request. This applies equally to documents of the Customer. However, such documents may be made accessible to those third parties to whom we are permitted to assign deliveries or services. 1.4. Orders placed by the Customer are deemed binding contract offers. Unless they stipulate otherwise, we are entitled to accept these within 14 working days as from the date of reception (in writing or by delivery of the goods).

2. Prices

2.1. Our prices apply according to the respectively applicable price list and/or our offer ex works and exclude freight charges, the cost of packaging, postage, insurance as well as other shipping costs unless expressly agreed otherwise. The applicable value added tax is payable in addition to the calculated price. 2.2. We charge packaging at cost. The packaging becomes the Customer's property; we shall not accept any returned packaging. Extra charges for express deliveries are for the Customer, as are charges for measurement cargo. 2.3. Extra charges which we incur as a result of late changes to the order will be invoiced to the Customer. 2.4. Sketches, drafts, trial prints, samples and similar preparatory work for printing orders which the Customer initiates will be invoiced even if the contract is not awarded. 2.5. If the agreed delivery date is more than four months after conclusion of the contract and if, after conclusion of the contract, cost increases have occurred with regard to the procurement and/or production of goods (including, without being limited to, energy, transport or raw material costs), for example due to force majeure within the meaning of Clause 9 of these terms and conditions or due to other events (e.g. due to operational disruptions of any kind, difficulties in procuring supplies, raw materials or energy, transport delays, strikes, lawful lockouts, shortages of labour, energy or raw materials, difficulties in procuring the necessary official permits, measures instigated by the authorities or the non-delivery, incorrect delivery or late delivery by suppliers) which existed at the time of the conclusion of the contract but for which we are not responsible, we shall be entitled to unilaterally increase the agreed price by a maximum of 10% using equitable discretion. If the aforementioned event is not only of temporary duration (more than 10 days) and/or the price increase is more than 10%, Seller shall be entitled to withdraw from the contract or to renegotiate the terms of the contract. In this respect, the provisions of Clause 9 of these terms and conditions shall apply.

3. Terms of Payment

3.1. Payment is due in full within 30 calendar days after the invoice date. 3.2. The Customer shall bear the transport costs ex warehouse as well as the cost of any transport insurance which the Customer requests, plus any possible customs duties, fees and taxes as well as other public dues for sale-by-dispatch orders (Item 5.1). 3.3. Bills of exchange shall only be accepted by virtue of a special agreement and on account of payment without extending any discount. Discounting and charges are for the Customer. They are payable by the Customer immediately after being invoiced. When accepting bills of exchange we shall not be liable for the timely submission, protesting, notification and return of the bills of exchange unless we or our vicarious agents are guilty of wilful intent or gross negligence. 3.4. Customised orders or the provision of exceptional products or any other advance performance may be subject to a payment in advance. 3.5. All cash and non-cash payments made relative to accounts payable must be effected in Euro. 3.6. The Customer is only entitled to offset against claims if its counterclaims are undisputed or have been established as final and absolute. The Customer is only entitled to assert rights of retention in relation to counterclaims pertaining to the same legal relationship. In the case of defects to the goods the Customer's reciprocal rights pursuant to Item 7.6. Sentence 2 of these terms and conditions remain unaffected. 4. Default of Payment 4.1. If the fulfillment of the payment claim is jeopardised by virtue of a deterioration of the Customer's financial situation which occurred or became known following the formation of the contract, we may demand advance payment and the immediate settlement of all outstanding invoices, withhold goods that have not yet been delivered and cease working on ongoing orders. Moreover, we are entitled to rescind the contract (Section 321 BGB), poss. after setting a deadline. For contracts specifying customised orders we may declare our rescission with immediate effect; the statutory regulations pertaining to the dispensability of setting a deadline remain unaffected. We are even entitled to these rights if the Customer, in spite of a reminder issued due to a default (insofar as this is required), did not effect a payment. 4.2. In the case of a default of payment (expiration of the payment deadline pursuant to Item 4.1), interest for default is payable at the statutory rate. This does not exclude the assertion of any further default damages nor the entitlement to commercial interest payable after the due date pursuant to Section 353 of the German Commercial Code [HGB].

5. Delivery and Acceptance

5.1. Goods are delivered ex works which also constitutes the place of fulfillment. At the Customer's request and cost, the goods will be dispatched to an alternative destination ("Sale by Dispatch"). Unless agreed otherwise, we have the right to autonomously determine the type of transport (especially the transport company, dispatch route, packaging). When shipping the goods, the risk of accidental loss and of accidental deterioration of the goods passes to the Customer at the time of dispatch. 5.2. Delivery dates are only binding if we expressly confirmed them. Otherwise, details pertaining to delivery periods or delivery deadlines take on the meaning of information. However, the delivery time does not commence before the Customer procured the necessary records, permits and approvals or prior to receiving an agreed down payment. A delay in delivery does not justify a claim for a contractual penalty. Statutory regulations shall determine when our delay in delivery has occurred, unless these terms and conditions stipulate otherwise. However, in any case a reminder by the Customer is required. 5.3. If we do not deliver by a binding delivery deadline the Customer shall grant us an appropriate extension. An extension need not be granted in the event of special circumstances which, after taking into consideration both parties' mutual interests, justify the immediate rescission of the contract. 5.4. If we are unable to comply with binding delivery periods for reasons for which we cannot be held responsible ("Unavailability of Performance"), we shall immediately notify the Customer accordingly and at the same time shall inform the Customer of the presumed new delivery period. If the performance remains unavailable even within the new delivery period, we are entitled to rescind the contract either in full or partially; we shall immediately reimburse any consideration already rendered by the Customer. The Unavailability of Performance in this meaning applies especially to the late self-delivery by our suppliers; if we concluded a matching covering transaction; if neither we nor the supplier are at fault or; as the individual case may be, if we are under no procurement obligation. 5.5. If the Customer does not accept goods supplied under the contract, we have the right to store the goods at the expense of the Customer and, following the unsuccessful expiration of a two-week period by which the goods are to be accepted, we may rescind the contract and demand compensation for damages. 5.6. We are not obligated to take back goods that are free from defects. If, however, we declare ourselves willing to take back goods that are free from defects, we are at liberty to invoice extra charges for the inspection, reservation or the like, based on the degree of work involved. Customised productions – subject to the regulations under Item 7. – are exempt from a return. If goods that are free from defects are taken back, the risk of accidental loss or accidental deterioration of the delivery item rests with the Customer. 6. Reservation of Title

6.1. We reserve the title to the supplied goods until all our claims against the Customer resulting from the business connection, including any and all future claims arising from contracts that were also formed at the same time or at a later point in time, have been settled. This applies even if individual or all claims of ours have been included in a current account which has been balanced and approved. 6.2. In the event of conduct contrary to the terms and conditions of the contract, especially in the event of a payment default, we are entitled to take back the goods, and the Customer is obligated to hand said goods over to us. Our taking back the goods can only be construed as a rescission of the contract if we expressly declare this in writing. If the Customer does not pay the due purchase price we may only assert these rights if we previously granted an adequate deadline for payment to the Customer which expired without success or if this can be dispensed with pursuant to the statutory regulations. The goods under reservation of title shall neither be pledged to third parties nor be transferred as security until the secured claims have been paid in full. The Customer shall immediately inform us in writing if and to the extent that third parties exercise any rights to the goods that are our property. In the event of attachments or other action by third parties the Customer shall inform us in writing and shall forward to us an attachment record as well as an affidavit pertaining to the identity of the attached item. 6.3. The Customer is entitled to resell and/or process the goods during the ordinary course of business. In this case, the following conditions apply: (a) The reservation of title covers the full value of the products resulting from the processing, mixing or combination of our goods, with us being deemed to be the manufacturer. If in the event of processing, mixing or combining with third party goods their title remains in effect, we acquire co-ownership in relation of the goods' invoice value to the processed, mixed or combined goods. In other respects the same applies to the resulting product as to the goods supplied under a reservation of title. (b) The buyer shall already as per today assign to us any claims resulting from reselling the goods or from the product against third parties in their entirety or in the amount of our potential co-ownership share pursuant to the above paragraph (a) as security. We accept such assignment. The buyer's obligations named under Item 6.2. apply also to such assigned claims. (c) The buyer shall remain authorised to collect the claims in addition to us. We shall undertake not to collect the claim provided that the buyer fulfils its payment obligations towards us; does not default payments; does not file for the instigation of insolvency proceedings; and no other deficiency in its performance capacity applies. However, if this is not the case we may demand that the buyer names the assigned claims and their debtors to us; provides us with all the necessary details required for a collection; hands us the respective documents; and informs the debtors (third parties) of such assignment. (d) If the realisable value of the securities exceeds our claims by more than 10%, we shall release securities at the request of the buyer at our discretion.

7. Customer's Claims for Defects

7.1. The Customer's rights in relation to defects in quality and title (including wrong delivery and short delivery) are governed by statutory regulations unless stipulated otherwise in the following. Special legal requirements pertaining to the final delivery of the goods to a consumer remain unaffected in any case (recourse against suppliers pursuant to Sections 478, 479 BGB). 7.2. The basis of our liability for defects is primarily the agreement pertaining to the quality of the goods. An agreement pertaining to the quality of the goods includes any and all product descriptions which constitute the subject matter of the individual contract, regardless as to whether the product description originates from the Customer, from the manufacturer or from us. 7.3. In the absence of any agreed quality, it is for the statutory regulations to assess whether a defect applies or not. We do not assume any liability for public statements on behalf of the manufacturer or of other third parties (e.g. advertisements).

7.4. The Customer's claims for defects require that the Customer fulfilled its legal duty to examine and obligation to give notice of defects (Sections 377, 381 HGB). We shall be immediately notified in writing of any defect that is detected during the examination or later. Such notification is deemed to have been given immediately if made within two weeks after having received the goods, whereby the timely posting of the notification suffices to comply with the deadline. Regardless of this duty to examine and obligation to give notice of defects the Customer shall indicate in writing any visible defects (including wrong delivery and short delivery) within two weeks of having received the goods whereby here, too, the timely posting of the notification suffices to comply with the deadline. If the Customer fails to properly examine and/or submit a notification of defect, our liability is excluded for such defect of which we were not notified. 7.5. If the delivered item is defective we may initially choose whether to remedy the defect (subsequent improvement) or deliver a non-defective item (replacement delivery). Our right to refuse any supplementary performance under the legal requirements remains unaffected. 7.6. We have the right to make the owed subsequent performance contingent upon the Customer paying the due purchasing price. However, the Customer is entitled to withhold such share of the purchase price which is appropriate in relation to the defect. 7.7. The Customer shall grant us the necessary time and opportunity required to fulfil the owed subsequent performance and in particular shall hand the rejected goods to us for the purpose of inspection. In the event of a substitute delivery the Customer shall return to us the defective item pursuant to statutory regulations. The subsequent performance consists neither of dismantling the defective item nor of its renewed installation, unless we were originally obligated to perform the installation. 7.8. We shall bear the necessary expenses required for the inspection and subsequent performance, especially the cost of transport, shipping, work and material (not included: cost of dismantling and installation) if indeed, a defect applies. However, should the Customer's request for a remedy of defect prove unjustified, we may demand that the Customer refund the costs resulting from this to us. 7.9. If the subsequent performance failed or the time limit established by the Customer for the subsequent fulfillment expired without success or can be dispensed with according to statutory regulations, the Customer may rescind the contract or reduce the purchase price. However, the right to rescind the contract does not apply to cases of minor defects. 7.10. The Customer's claims for compensation and/or for the replacement of futile expenses exist only subject to Item 8 and are excluded in other respects. 8. Other Liability 8.1. If nothing to the contrary emerges from these terms and conditions including the subsequent provisions, we shall be liable in the case of a breach of contractual and non-contractual obligations pursuant to the relevant statutory regulations. 8.2. We are liable to compensate for damages in the case of intent and gross negligence, regardless of the legal grounds. In cases of simple negligence we are only liable a) for damage resulting from harm to life, body or health; b) for damage resulting from the breach of a material contractual obligation (obligation whose fulfillment facilitates the proper performance of the contract sine qua non, compliance with which the contractual party regularly relies upon and may rely upon); in this case, however, our liability is limited to replacing the typically foreseeable damage that may occur. 8.3. The limitations of liability resulting from Item 8.2. do not apply to the extent that we fraudulently concealed a defect or warranted a property of the goods. The same applies to claims of the Customer under the Product Liability Act. 8.4. The Customer may only rescind or terminate the contract for a breach of obligation which does not consist of a defect, if we are liable for the breach of obligation. A free right of termination on behalf of the Customer is exempt (especially pursuant to Sections 651, 649 BGB). In other respects the statutory requirements and legal consequences apply accordingly. 9. Force Majeure 9.1 The parties shall not be liable for damage or for the partial or complete non-fulfilment of obligations under this contract if the respective damage or non-fulfilment is due to a circumstance which could not be foreseen at the time of the conclusion of the contract and the parties and their vicarious agents cannot prevent these consequences or remedy them by reasonable measures („Force Majeure“). 9.2 In any event, Force Majeure shall be deemed to exist in the event of hostilities (irrespective of the fact as to whether or not war has been declared), riots, explosions, outbreaks of fire, flooding, earthquakes, typhoons, epidemics, shortages of raw materials, energy and supplies, difficulties in procuring raw materials, supplies or energy and/or labour disputes as a result of which business operations are wholly or mainly disrupted, as well as in the event of acts, omissions or governmental measures or in complying with governmental requests and in the event of the disruption of operating facilities or parts thereof which serve to fulfil obligations under this contract. 9.3 In the event of the occurrence of Force Majeure, the Parties shall notify each other thereof without undue delay and shall provide information within 10 days, in particular as to the extent and, as far as reasonably possible, the expected duration of the Force Majeure event. In addition, the affected party shall use its best efforts to remedy the Force Majeure event or to limit its impact on this Agreement as far as possible. 9.4 Should the event of force majeure last longer than 3 weeks or should this be expected, the contracting parties shall jointly agree on the further course of action. If the event of force majeure is not temporary for the contracting party concerned, i.e. lasts for more than 6 weeks, and prevents it from fulfilling its contractual obligations, and if it is unreasonable for the Buyer to wait, the Buyer shall be entitled to terminate and withdraw from this contract in writing without observing a notice period. 9.5 If Seller's production costs for the owed product (including, yet without limitation, energy, transport and/or raw material costs) increase for reasons of the Force Majeure event persisting (more than 10 days) or if circumstances which existed at the time of the conclusion of the contract but which have changed in other respects so that Seller cannot reasonably be expected to fulfil one or more of Seller's obligations, Seller may, by written notice to Buyer, request an adjustment of the contract in order to remove such hardship. In particular: Seller cannot reasonably be expected to adhere to the existing

contract if production costs increase by more than 10% and/or there are difficulties in the procurement of supplies, raw materials or energy and/or there are transport delays and/or there are shortages of labour, energy or raw materials and/or there are difficulties in obtaining necessary official permits and/or there are non-deliveries, incorrect deliveries or late deliveries by suppliers; provided that the aforementioned difficulties are expected to last for more than 10 days. If the parties are unable to agree on how to amend the contract within 10 days of Seller's offer to amend the contract, Seller may withdraw from the contract by giving 5 days' written notice to Buyer.

10. Documents and Tools, Insurance, Third Party Rights

10.1. Master copies, drawings, raw materials, print substrates and other items suitable for reuse such as semi-finished and finished products which the Customer provided to us shall be collected by the Customer upon delivery; alternatively, at the Customer's request, we shall return these to the Customer at the Customer's expense. They will only be stored beyond the delivery date following prior arrangement and in return for a special consideration. 10.2. The items described above will be handled with care until the date of delivery. We shall only be held liable for damage in the case of intent or gross negligence. 10.3. If the items described above shall be insured, the Customer shall autonomously arrange for them to be insured. 10.4. Devices, tools and other master copies which are necessary to perform the contract and which we developed and manufactured remain our property even if proportionate costs were invoiced for this. 10.5. The Customer alone is responsible for ensuring that the performance of its contract does not infringe upon any third party rights, and here in particular copyrights, trademark rights, patents or registered designs. The Customer shall release us from all third party claims for the violation of such rights upon first demand.

11. Statutory Limitation

11.1. By way of derogation from Section 438 (Content 1) no. 3 BGB the general limitation period for claims resulting from defects in quality and title is one year as from delivery. To the extent that an acceptance as been agreed, the statutory limitation commences upon acceptance. 11.2. The aforementioned limitation periods under commercial law apply equally to contractual and non-contractual claims for damages of the Customer which are due to a defect of the goods unless application of the ordinary statutory limitation period (Sections 195, 199 BGB) would, as the individual case may be, lead to a shorter limitation period. In any case, the limitation periods under the Product Liability Act remain unaffected. In other respects the Customer's claims for damages pursuant to Item 8 fall exclusively under the statutory limitation periods.

12. Imprint, Jurisdiction

12.1. We may refer to the name of our company in an appropriate form on the products that are the subject of the contract. The Customer may only withhold its consent if it has an overriding interest in this. 12.2. If the Customer is a fully-qualified merchant, a legal person under public law or a special fund under public law, the Einbeck local court or the Göttingen regional court, depending on the substantive competence, shall have exclusive jurisdiction for all disputes arising between the Parties, including any and all proceedings related to bills of exchange and deeds. The same jurisdictions apply if the Customer does not have a general place of jurisdiction in Germany, moves its residence or general place of abode after entering into the agreement abroad, or the Customer's residence or general place of abode is unknown at the time the complaint is being filed.

13. Miscellaneous

13.1. The law of the Federal Republic of Germany applies excluding international uniform law, and here in particular the UN Sales Convention. The requirements and effects of the reservation of title pursuant to Item 6 are subject to such law as is applicable at the respective storage location of the goods provided that under said law, a choice of law made in favour of German law is not permitted or is void. 13.2. We are authorised within the scope of business relationships, to process personal information that has been entrusted to us within the scope of our mission, i.e. to store, to transfer, to modify and to erase such information. 13.3. The potential ineffectiveness of one or several provisions within these terms and conditions does not affect the validity of the remaining provisions.
